# ID Inspection Plus

## Supercharge your Inspection Process

## Overview

**ID InspectionPlus** is your digital edge for faster, more accurate, and transparent inspections.
It transforms routine check-ins and service evaluations into streamlined, high-impact moments that boost efficiency and customer confidence.

## Precision, Professionalism, and Profitability Built In

ID InspectionPlus is a next-generation inspection solution purpose-built for equipment dealers who need more than just a checklist. With detailed, industry-specific measurement tools, and customizable templates, it empowers technicians to capture, communicate, and act on inspection data with a new level of precision and confidence.

Gone are the days of vague notes and missed opportunities. Dealers can now define exact specs and document them step-by-step resulting in fewer errors, fewer disputes, and more trust with customers.

ID InspectionPlus becomes not just a service tool, but a revenue engine.

## Purpose-Built Tools for Powerful Inspections

### Precision That Protects Your Bottomline

Dealers can now build inspections using precise, industry-specific measurements. This level of granularity ensures greater accuracy and accountability, helping prevent costly errors and customer disputes.

### Smarter Templates for a Stronger Workflow

The new template builder empowers users to create reusable, fully configurable inspection templates featuring:
- Pass/Fail options.
- Spec and Value ranges.
- Unit Conversions (e.g., inches to centimeters).
- Multimedia Attachments at each step.

- Templates can be grouped, repeated, and versioned, allowing dealers to scale inspections effortlessly across equipment types and service scenarios.
- Templates can be created on the desktop and seamlessly deployed for use in IntelliDealer or the ID MobileAccess app, ensuring technicians have the right tools at their fingertips.

## Enhanced Inspector Workflow. Elevated Performance.

Inspectors can:
• Add detailed notes and photos at each site.
• Trigger job code suggestions based on inspection results.
• Skip or override job code suggestions if needed.
The system supports both desktop and mobile workflows.

### Stronger Dealer-Customer Communication

InspectionPlus elevates the way dealers communicate with customers by:
• Generating structured, searchable PDFs.
• Supporting real-time updates resulting in more transparency, trust, and professionalism at every touch point.

### Efficiency that Drives Revenue

InspectionPlus helps dealers streamline service operations by:
• Tracking inspections across units.
• Auto-generating or updating quotes based on inspection results.
• Capturing declined services for future follow-up.
This not only boosts workflow efficiency but also unlocks new revenue opportunities through proactive, data-driven service recommendations.
