

## Smarter Payments

### Worldpay IntelliDealer integration is credit card processing built for your business

The Worldpay IntelliDealer integration brings the dealerships a modernized integrated card payment solution that simplifies daily operations while keeping your heavy equipment transactions secure.

With a robust set of features that include chip card acceptance, point-to-point encryption and tokenization, Worldpay has the tools you need to combat fraud and protect your customers' data.

Happier customers from faster transactions and shorter lines with secure payment processing.

#### This innovative integration solution includes:

-  Accept credit and debit card payment
-  MyDealer Compatible
-  Pay by TEXT immediately
-  Lane-specific transaction tracking and documentation
-  Incremental authorization amounts
-  Ability to store credit card details
-  New EMV/Chip compliant hardware- No PC client software required
-  Signature capture (dependent upon device)
-  Final authorization amounts within 15% of original amount will not require re-authorization
