

Rental Management Data Sheet

OVERVIEW

e-Emphasys Rental Management enables dealerships to plan, operate, monitor, and improve rental operations, to increase profitability and enhance customer service. e-Emphasys integrates the rental department with all other functions. e-Emphasys Rental Management supports multi-site rental operations, optimizing utilization across branches. It provides flexible pricing and price simulation options, to support advanced pricing schemes with multiple price and discount variables. e-Emphasys caters to a variety of contract types (rent to rent, rent to sell and lease).

KEY FEATURES

- Tracking of customers' rental inquiries as a guide to the sales force for follow-up and conversion of prospects to customers.
- Analysis of customer business history.
- Efficient administration of the rental process – from rental quotation to invoicing and collection.
- Fleet inventory look-ups with complete visibility of models / configurations across all branches.
- Detailed tracking of rental status and fleet availability.
- Tracking of multiple meter readings.
- Facilitate billing through rental contracts based on multiple meters.
- Price simulation for rental rate structuring.
- Flexible rental invoicing with automated calculation of invoice amounts, including off-rent periods.
- Rent-to-rent, rent-to-sell and lease contracts.
- Rent of equipment configurations, and / or individual base units, attachments, parts and components.
- Equipment configuration management, inspection, maintenance, transfer and hauling.
- Advanced Parts Rental with inventory handling and shortage handling capability across warehouses.
- Ability to rent consignment parts.
- Flexibility to manage any number of base units and attachments for different contract time periods (start dates & end dates) on the same contract, at different rental rates.
- Parts, rentals and sales of serialized and non-serialized parts on the same rental contract.
- Various formulae for calculation of rental rates (monthly / weekly / daily / hourly).
- Multi-tier discounting of renting rates (general / campaign / seasonal / periodic).
- Advanced graphical Rental Availability chart based on intelligent search criteria and detailed status tracking.
- Inspection and audit of inspection reports.
- Rental Reservation feature enables easy and fast way to manage multiple bookings, move between bookings and track different rental statuses for quick turnarounds.

Rental Management Data Sheet

The screenshot displays the 'Equipment Data' section of the software. It features a table with columns for Contract, Unit, Desc, Equip. Type, Product, Cust. No., Model/Equipment, Manufacturer, Rental Number, Used, Trade In, and Year. The table lists various PC360LC-11 HYD EXC - 12' AR Model units. To the right, the 'Context Viewer' shows a detailed view of a specific asset, including a photo of a yellow excavator and a 'pc360lc-11.jpg' image.
