

# WORLDPAY GATEWAY

## Integrations

### OVERVIEW

Embrace a streamlined and modern approach to credit card processing. Harness the power of the **WORLDPAY Gateway** to modernize and simplify credit card transactions. This e-Emphasys interface simplifies processing of credit card transactions by providing a secure payment gateway that integrates seamlessly with all the major credit card brands such as VISA, MasterCard, AMEX and Discover.

### KEY FEATURES

- Enables dealerships to securely process public label credit cards from the ERP.
- Simplify daily operations.
- Enhance the security of heavy equipment transactions.
- Modernize payment processing methods.
- As the demand for digital payments grows, this integration empowers dealerships to enhance the checkout experience, allowing customers to pay conveniently through credit and debit cards. This seamless process helps reduce instances of abandoned carts and ultimately boosts revenue.

### BENEFITS

- Immediate processing of payments upon invoicing.
- Pre-authorize the credit card before invoicing to ensure funds are available and capture the amount at the time of invoicing.
- Allow representatives to accept advance credit card payments for orders.
- Efficiently handle refunds and returns to the original mode of payment.
- Streamline future payments by using WORLDPAY Omni Tokens.
- Simplify the process of collecting multiple invoice payments using a credit card.
- Enhance operational efficiency.
- Provide a modern, secure and convenient payment experience for your customers.
